

Dear Generous Playtester,

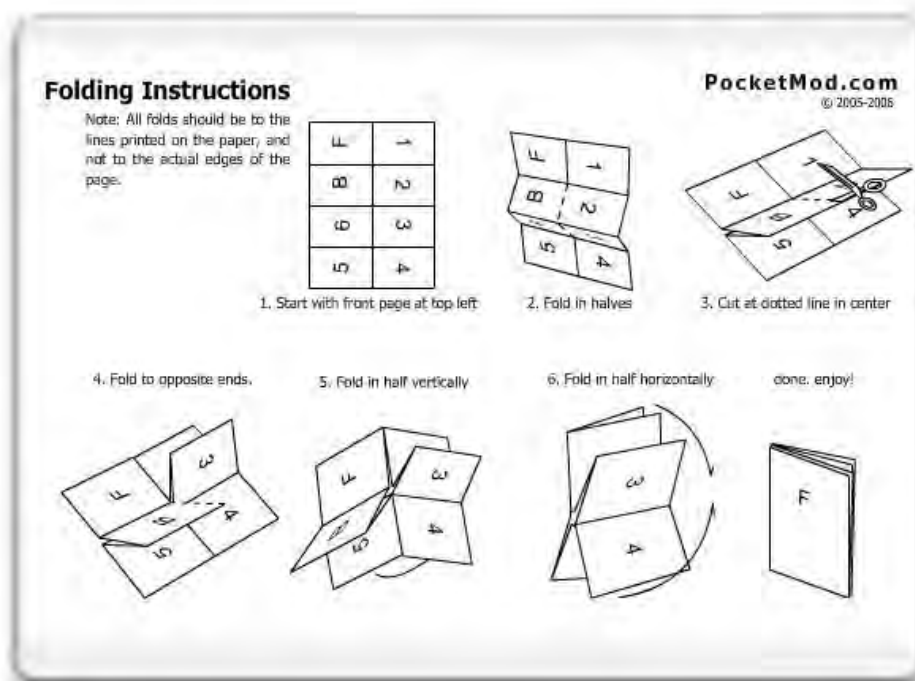

Thank you for playtesting *Musketgears RPG*! This role-playing game utilizes two decks of playing cards and character sheets and adventure module in Pocketmod format.

Setup for Play

The players will need one regular deck of playing cards, with jokers. Each player can have their own deck.

The GM will need a standard deck of playing cards with the jokers, face cards, and aces removed.

To fold the Pocketmod documents, follow the below instructions.

Giving Feedback

This playtest packet is in alpha playtest stage, so all feedback is helpful, whether it's information on how the story flowed, what changes you needed to make, which rules or draws did not work, and trends (for example: "it seems like it's too easy" is a trend).

Please email all feedback to mortaine@gmail.com with "**Musketgears**" in the subject line.

If you indicate the name you'd like to use in the credits, I will include you in the playtester credits.

Thanks in advance for playtesting this new game!

Stephanie Bryant
